SaniZap® Products  
A New Standard for Steam.  
A New Standard for Microbe Removal and  
Cleaning.

SaniZap-1 with Backpack

For quicker, deeper and more effective cleaning/sanitation *without* chemicals, use the [SaniZap® line of patented products](#).

Instant on-off, high-temperature steam impact, superior drying technology, energy efficiency, mobility and lower operational costs.

Compare just vapor from other steam generators with the power and superior technology of the SaniZap® products.

Its simple – clean without contaminating with toxic chemicals.

[Deep-cleaning in restaurants and taverns.](#)

## SANIZAP-1

### Description

- Super-heated steam with in-situ air dry
- Power 1 KW. Voltage 120V
- Battery rechargeable water pump.
- (50/60Hz). Backpack Included.
- For a limited period the soil and steam extender 18" is included at no extra charge.
- Maximum temperature between 300°C and 400°C.
- Adjustable by Flow.
- Operation is for 110V to 120V (50/60Hz). For cleaning and decontamination of targeted regions.
- Extension attachment. Extends ~18"
- Class 4 Indicator testing
- Long lasting (greater than 5 hours) per partial refill

✓ **Applications Support**

✓ **Hardware Support**

✓ **Guarantee & Warranty**

- Super-heated Steam/Air with in-situ air dry. Power 1 KW. Voltage 120V (50/60Hz). Backpack Included.
- Back-pack has rechargeable battery pump. Re-charger is included.
- Elegant wheel along container box included.
- For a limited period the soil and steam extender 18" is included at no extra charge.
- Maximum temperature between 300°C and 400°C. Adjustable by flow.
- Operation is for 110V to 120V (50/60Hz). For cleaning and decontamination of targeted areas. Multiple nozzles and extenders included.
- Extender attachment. Extends ~18"
- *Amazing* novel technology to reduce any residual condensation water residue.
- Easy steam cleaning.
- Water refill time ~5hrs. Refill while in use.
- Backpack can hold up to 4 Gallons
- Boiler-free ~up to 1 kg/hr super heated-steam jet for cleaning and drying. Fine tunable valve included.
- Patented product.
- Easy Plug and Play
- Pure steam with envelope hot air drying combinatoric process-unit.
- Continuous jet-use beyond an hour is allowed as long as device use is within allowed the specifications.
- Safety distance flexible spring feature.
- Safety against earth fault (ground fault) is provided.
- All cords included.
- (cUL) Canada Electronics are Offered where Required.
- Volts 120V Single Phase
- Current/Power ~1 kW Nominal
- Phase Single Phase, 50/60Hz
- Pressure ~1 bar / 14.5psi absolute (0 bar relative to room).
- Maximum Steam Temperature Variable up to 400°C
- Velocity of steam stream and dryer ~10 m/s
